CypherLink — Product Considerations and Behavioral Design

Core Product Identity

CypherLink is not a clout-driven creator platform. The platform exists to help emerging underground creators build trust, form collaborations, and sustain local creative ecosystems.

Anti-Clout Philosophy

- No likes
- No public downvotes
- No visible creator rankings
- No engagement farming
- No algorithmic popularity dominance

Trust Philosophy

- Trust should emerge from participation
- Reputation should remain contextual
- Soft public trust indicators only
- No public numerical trust scoring
- Contribution history matters more than vanity metrics

Newcomer Integration

- Soft newcomer discovery boosts
- Low-risk micro-collaboration loops
- Open collaboration support
- Temporary visibility rotation
- Trust formation through repeated interaction

Community Philosophy

- Community contribution tied to underground scene improvement
- Cleanup drives and workshops allowed
- Avoid generic activism infrastructure

- Preserve underground authenticity

Moderation Philosophy

- Allow raw artistic expression
- Moderate threats and exploitation
- Avoid sterile corporate moderation
- Preserve underground culture authenticity
