CypherLink — Implementation Roadmap

Phase 1 — Identity and Collaboration Foundation

- Role-based profiles
- Capability proof uploads
- Project creation
- Open collaboration system
- Role occupancy states
- Locality-aware discovery

Phase 2 — Trust Layer

- Contribution history
- Contextual trust indicators
- Collaboration memory
- Soft reputation weighting
- Newcomer rotation systems

Phase 3 — Cyphers and Events

- Public and invite-only cyphers
- Participant caps
- Safety controls
- Event participation memory
- Follow-up collaboration suggestions

Phase 4 — Community Ecosystem

- Community projects
- Workshops
- Scene contribution tracking
- Collective emergence systems

Long-Term Risks

- Clout drift

- Trust aristocracy
- AI-generated spam
- Moderation scaling
- Media storage explosion
- Scene fragmentation

Primary Success Metric

Successful first-time collaborations between previously unconnected creators.
